LegalEase: AI-Powered Legal Document Generator

Project Description

LegalEase leverages state-of-the-art Generative AI to simplify the creation of legal documents by providing customizable, accurate, and editable templates for a wide range of use cases. Users can generate employment contracts, lease agreements, NDAs, and more—all tailored to their specific inputs like involved parties, effective dates, and key terms.

Built with FastAPI and integrated with a powerful AI core, LegalEase ensures users receive professional-grade legal documents that maintain formatting standards, include custom branding (such as logos and fonts), and support features like editable previews and automatic term tables.

With secure handling of sensitive user data and seamless document export options (.PDF, .DOCX, .TXT), the platform bridges the gap between accessibility and legal professionalism.

Scenarios: Startup founder and Employment Contract; Freelancer and Non-Disclosure Agreement; Landlord and Residential Lease Agreement.

Pre-requisites

- 1. FastAPI Framework Knowledge
- 2. Google Gemini API Familiarity
- 3. Streamlit for Frontend
- 4. Python Programming Proficiency
- 5. Environment Setup: pip install fastapi uvicorn streamlit python-docx fpdf Pillow requests google-generativeai python-dotenv

Project Workflow

- Activity 1: Model Selection and System Architecture
- Activity 2: Core Functionalities Development
- Activity 3: main.py & API Logic
- Activity 4: Frontend with Streamlit
- Activity 5: Deployment
- Activity 6: Conclusion
